

HELPFUL TIPS FOR COMPLETING BUILDING BLOCKS

It is recommended that you read these tips before beginning the program

1. You will need computer speakers to hear the lessons.
2. Be sure to allow pop-ups from the site so that you can view any lessons that utilize pop-ups.
3. This is a self-paced course; you can replay lessons as often as you need before marking them as complete.
4. At any time during a lesson/video, you can push “pause” to suspend the lesson/video. Pausing will freeze the screen so that you can view the text / information on the screen for as long as needed. Push “play” to resume the lesson.
5. Most videos do begin automatically; there are a few that you will need to push “play” to begin.
6. You may find that some audio begins automatically before the visual. In these circumstances, be sure to push “play” to begin the visual so that the audio and the visual are synchronized.
7. If you are having trouble viewing a particular lesson or video, go on to the next lesson. Return to the first lesson when you have time to restart it.
